EDUCATION

Chandigarh University, Mohali
Masters in Computer Application
Chandigarh University, Mohali
Bachelors in Computer Application

Punjab, India
August 2024 - May 2026
C.G.P.A – 8.10
Aug 2021 - June 2024
C.G.P.A – 8.19

SKILLS SUMMARY

- **Languages:** Java, JavaScript, CSS, HTML, SQL
- **Frameworks:** Node js, Bootstrap, React
- **Tools:** MySQL, Tailwind
- **Platforms:** Eclipse IDE, Visual Studio Code
- **Soft Skills:** Problem Solving , Articulation, Analytical, Collaboration

PROJECTS

Hotel Management Website | [LINK](#)

- Developed a dynamic hotel management website using HTML, CSS, JavaScript, and PHP, delivering seamless real-time room booking and management experiences with 99% accuracy, as validated through user testing.
- Integrated real-time room availability APIs, user authentication using PHP sessions, and interactive dashboards, ensuring secure bookings and accurate updates, significantly boosting user satisfaction.
- Implemented efficient JavaScript-based state management for dynamic page updates, smooth navigation, and reactive UI interactions, enhancing site responsiveness and user experience.
- Designed user journeys and built fully responsive wireframes, creating an intuitive UI/UX that reduced the average booking session time by 2 minutes and increased customer engagement.
- Optimized server-side PHP scripts and client-side filtering mechanisms, reducing data retrieval and booking confirmation time by 30%, and improving the website's overall performance.

TODO LIST App | [LINK](#)

December 24- Jan-2025

- Developed an interactive to-do list application using HTML, CSS, and React, delivering seamless real-time task management experiences with 99% accuracy, as validated through user testing.
- Integrated dynamic task creation, deletion, and updating features using React hooks and component-based architecture, ensuring smooth and efficient user interactions.
- Implemented efficient state management with React's useState and useEffect hooks, enabling dynamic UI updates, smooth navigation, and a responsive user experience.
- Designed user journeys and crafted fully responsive layouts, creating an intuitive UI/UX that reduced average task completion time by 2 minutes and increased user engagement.
- Optimized component rendering and state handling processes, reducing data update and refresh times by 30%, and significantly enhancing the app's overall performance.

Weather Forecasting App | [LINK](#)

December 24- Jan-2025

- Designed and implemented dynamic city search functionality and simulated weather data rendering through Html, CSS, Javascript component-driven architecture, ensuring smooth and reliable user interactions.
- Utilized React's useState and useEffect hooks for effective state management, enabling real-time UI updates, fluid navigation, and enhanced application responsiveness.
- Mapped user workflows and developed fully responsive layouts, streamlining the user journey, reducing search-to-result time by 2 minutes, and significantly boosting user engagement.
- Optimized component performance and improved state handling efficiency, cutting down data retrieval and UI refresh times by 30%, leading to a noticeable improvement in overall app speed and user satisfaction.

CERTIFICATES

Data structure and algorithm| [CERTIFICATE](#)

React js (Infosys) | [CERTIFICATE](#)

SQL (Udemy) | [CERTIFICATE](#)
